To whom it may concern,

We are pleased to write a letter in support of a Grant for Saving Hope Animal Rescue. We strongly support this grant application and the focus on rescuing canines and felines from the Fort Worth Animal Care and Control.

As an animal hospital whose mission is to foster wellness in canines and felines, we work with Saving Hope Animal Rescue by providing discounted medical services to help heal the malnourished, sick, and/or injured animals brought to us by Saving Hope Animal Rescue. Their passion is to save these animals' lives, return them to health, and locate good homes for them which in turn reduces shelter overcrowding and euthanasia. Thanks to Saving Hope Animal Rescue, over 1500 animals have been helped, fostered, and rehomed (these are just the ones that have come through our doors.) Many others have been helped by other veterinarians. It has been an honor and privilege to partner alongside this incredible team of individuals in this rescue over the years. We admire your initiatives to fund projects that have greatly benefited the DFW community.

Thank you,

Jennifer Barker, Practice Manager
